

Ruby Romeu — Full Stack Engineer

(305) 988-3494

Yes, Ruby, like the programming language. Sattar is my Maiden name.

I'm an engineer in the Greater Boston Area who has built multiple full-stack applications.

Using software development as well as my background in education, my goal is to impact educational technology and the future of tech resources available in underserved communities.

SOFTWARE EXPERIENCE

General Assembly, Boston - Engineering Fellow JUNE 2020 - SEP 2020

General Assembly is an immersive program that prepares software engineers with a holistic technical foundation essential for full-stack development.

- Built full-stack applications for teachers and currently conducting user research for continued iteration.
- Incorporated functionality from 3rd-party APIs to add complexity and nuance.

STEM ENRG, Boston - Engineering Mentee SEP 2020 - PRESENT

A 6-month program to create economic equity for women of color in STEM careers through mentorship, leadership training, and collaboration in the tech industry.

PROJECTS

OverAchiever — A flashcard learning application [[Python](#), [Django](#), [React](#), [Javascript](#), [PostgreSQL](#), [Bootstrap](#), [SCSS](#)]

The Holistic Educator — A classroom connections tracking application [[Mongoose](#), [Express](#), [MongoDB](#), [Javascript](#), [Bootstrap](#), [Handlebars](#), [SCSS](#)]
