

Ruby Romeu — Full Stack Engineer

(305) 988-3494

Yes, Ruby, like the programming language. Sattar is my Maiden name.

I'm an engineer in the Greater Boston Area who has built multiple full-stack applications. Using software development as well as my background in education, my goal is to impact educational technology and the future of tech resources available in underserved communities.

SOFTWARE EXPERIENCE

General Assembly, Boston – Engineering Fellow JUNE 2020 - PRESENT

General Assembly is an immersive program that prepares software engineers with a holistic technical foundation essential for full-stack development.

- *Built full-stack applications for teachers and currently conducting user research for continued iteration.*
- *Applied object-oriented programming concepts, using libraries like React.*
- *Incorporated functionality from APIs to add complexity and nuance.*

PROJECTS

The Holistic Educator — *Full-stack application designed for classroom connections.*

Education Donation Online Store— *A full-stack e-commerce team project/application where donors can purchase items for local classrooms.*

OTHER PROFESSIONAL EXPERIENCE

KIPP Academy, Boston – Lead Teacher FEBRUARY 2018 - JUNE 2020

KIPP is a mission-driven school where teachers regularly collaborate..

- *Led a DEI workshop for a team of 30+ educators and school leaders, resulting in actionable commitments for the school environment*
- *Designed a K-8 Women's History curriculum, utilizing G-Suite tech resources*
- *Led a class of 25 families, utilizing Tableau to analyze data and inform instruction*

The Mildred (BPS), Boston – Lead Teacher OCTOBER 2017 - FEBRUARY 2018
